SUMMARY

I am a Computer Engineering student at Rajarambapu Institute of Technology, passionate about transforming data into intelligent solutions. With a basic foundation in Data Structures, OOP, and Java, I am actively building expertise in data science and analytics to create a meaningful impact.

ROLES & RESPONSIBILITIES

Rise & Recruit Club, RIT

2025 - 2026

Head

Leading placement activities and organising campus recruitment drives for 350+ students. Helping students become industry-ready through mock interviews and resume workshops

Computer Science and Engineering Student Association (CSEA)

2025 - 2026

President

I am leading the student body, representing over 350+ students. Organising technical workshops and cultural events. Working with faculty to enhance student resources and facilities. Organising events for tech fest and other college activities

PROJECTS

Smart Accident Detection and Routing System

Developed an AI-powered mobile app for real-time road accident detection using smartphone sensors like GPS, accelerometer, and gyroscope. The system sends instant emergency alerts, provides first-aid guidance, and suggests nearby hospitals using Firebase and SMS services.

Lyvo – Full-Stack Sneaker Ecommerce Platform

Built a full-stack ecommerce platform with a customer storefront and admin dashboard using React, Node.js/Express, and MongoDB. Implemented JWT authentication, product filtering with live search, cart/checkout, and an admin panel with sales analytics and order management.

Student Growth (EduPilot AI) – AI-Powered Student Performance Platform

Developed a full-stack platform with a React (TypeScript) frontend, Spring Boot backend, and a FastAPI-based ML service for personalized student recommendations. Built role-based dashboards for students, faculty, and admins with adaptive quizzes, a career center, and a Pomodoro focus timer, containerized with Docker Compose using MongoDB and Redis.
